

Short Note: About change of Morphology editor

(Version 1.4.2)

In new version (1.4.2), Geometry editor and Segment editor are unified to a single Morphology editor. This note shows the difference between two versions.

Previous version (1.4.1):

Morphology editor is composed of separated Geometry editor and Segment editor. Both dialogs have different viewers. If you want to make segments, geometry dialog must be closed to open segment dialog.

New version (1.4.2):

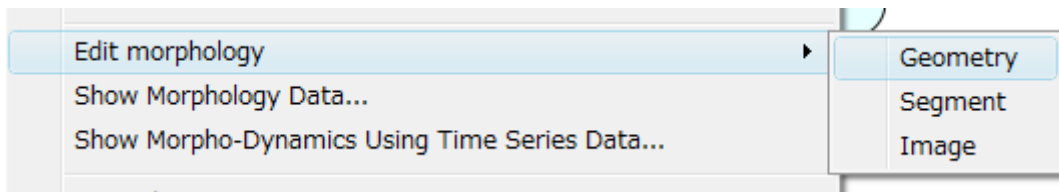

Unified single Morphology editor has two tabs, Geometry and Segment tabs.

Morphology editor dialog has a single viewer. Operation manual will be updated soon.

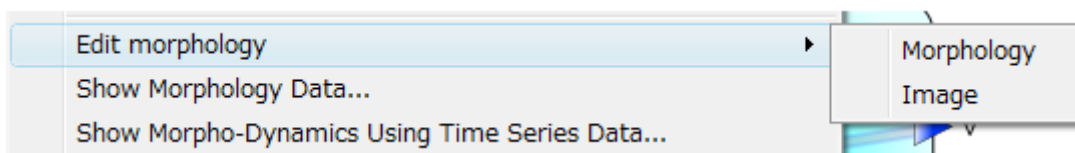

The followings is a GUI comparison between previous and new versions.
